## WORK EXPERIENCE

### Full Stack Engineering Analyst Accenture Solutions Pvt.ltd

09/2021 - Present

#### Projects:

- **Item Recommendation:** Led the development of **advanced React modals** to display product recommendations by integrating backend RESTful APIs and managing state with **Hooks**, driving significant profit growth for a major retail client, Walmart.
- **Walmart Discounts:** Implemented a **seller-facing modal** to streamline the process of accepting additional discounts provided by Walmart on their products.
- **Seller Feedback:** Developed a **dynamic tooltip** feature using **React Tooltip** that provided detailed insights into why items were rejected, leveraging integration with a rejection code API.
- **Promo Price after submission deadline:** Implemented a **feature that enabled sellers to adjust promo prices** (with only price reduction allowed) for items in declined or in-review status, even after the submission deadline.
- **Aurora Migration:** Successfully migrated the entire Walmart seller centre application to the **Aurora platform**, collaborated with UX and backend developers to rebuild the UI from scratch using Storybook and a new UX design.
- **Canada Assortment Growth Onboarding:** Owned and implemented **variant-specific onboarding** for features such as Assortment Growth across different global regions, resulting in a **25% increase** in user engagement.
- **Lingui Integration:** Integrated Spanish, French and Chinese translations for various micro-apps in the Walmart Seller Center to enhance the **global user experience**.
- Developed and integrated a **responsive CSS loader** to enhance user experience (UX), ensuring it remains visible until the **asynchronous PDF generation promise resolves**.
- Implemented **cross-device responsiveness** and compatibility with various screen sizes using **Fluid Layouts and Media Queries**.
- Implemented comprehensive unit test cases using **Jest and React Testing Library (RTL)**, achieving a **30% reduction** in bug-related delays and a **20% increase** in code quality. Added front-end automation testing with **Playwright**. Resulted in **70% reduction** in cross-browser testing.
